Create Workflow Using Zoho Creator

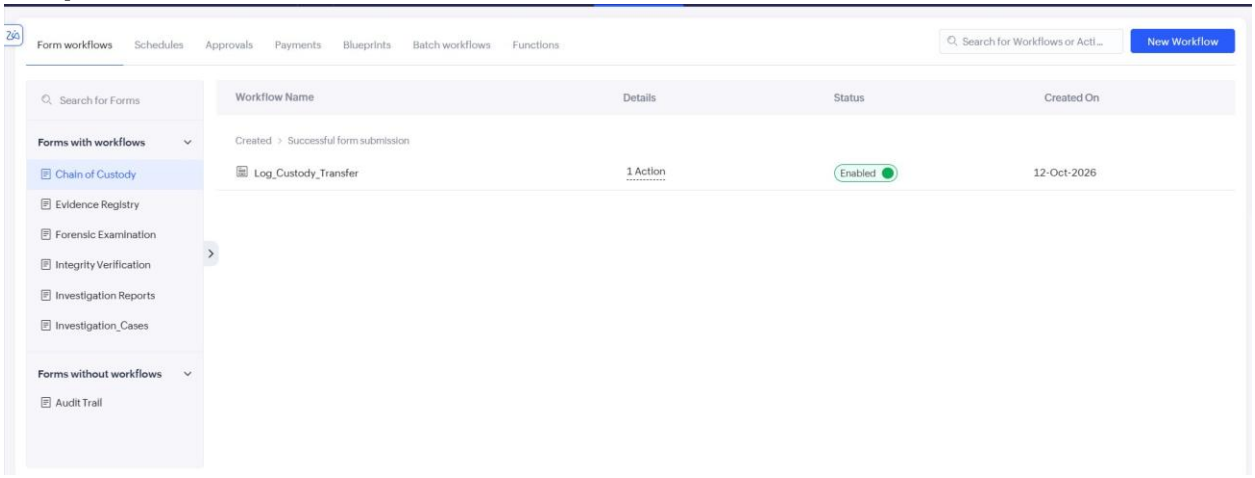

Aim

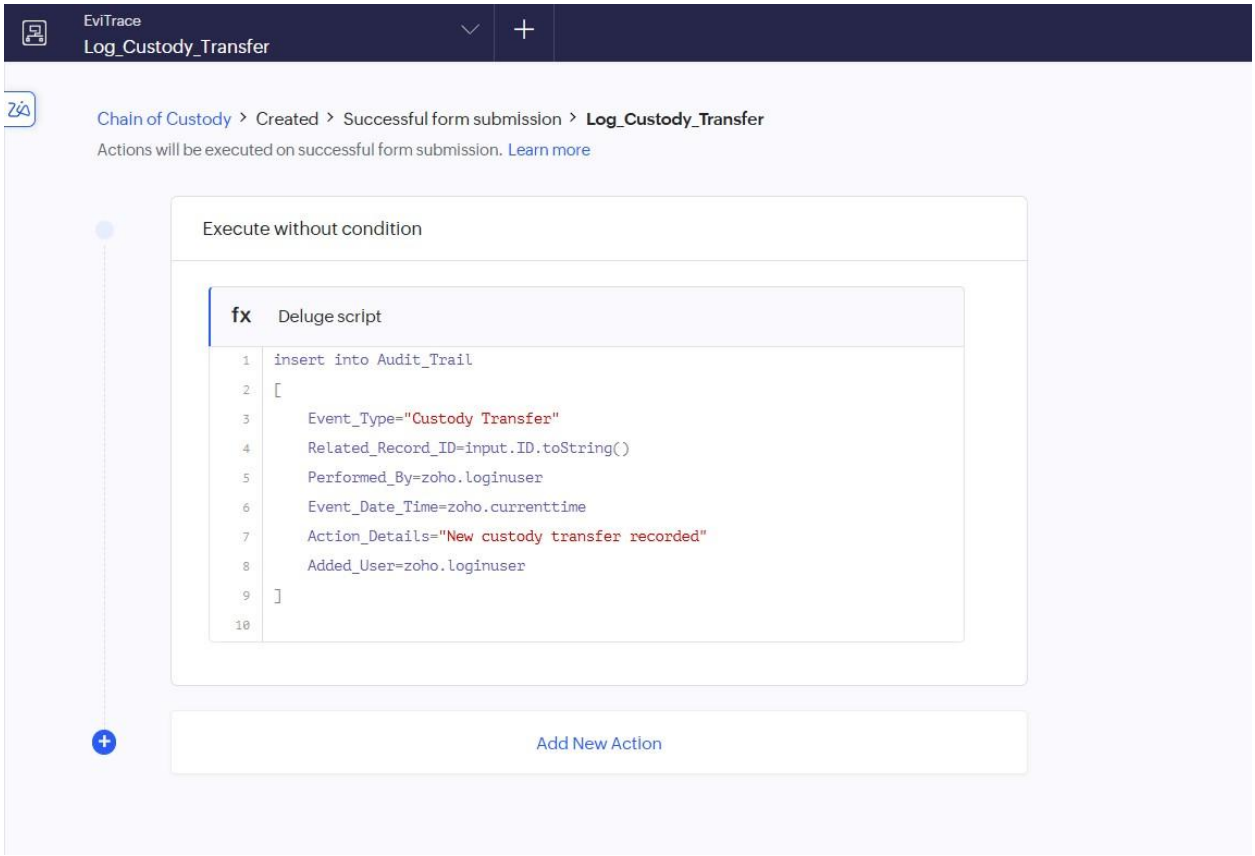

To create and implement workflows in Zoho Creator to automate activities in the EviTrace Digital Evidence Chain-of-Custody and Investigation Tracking System.

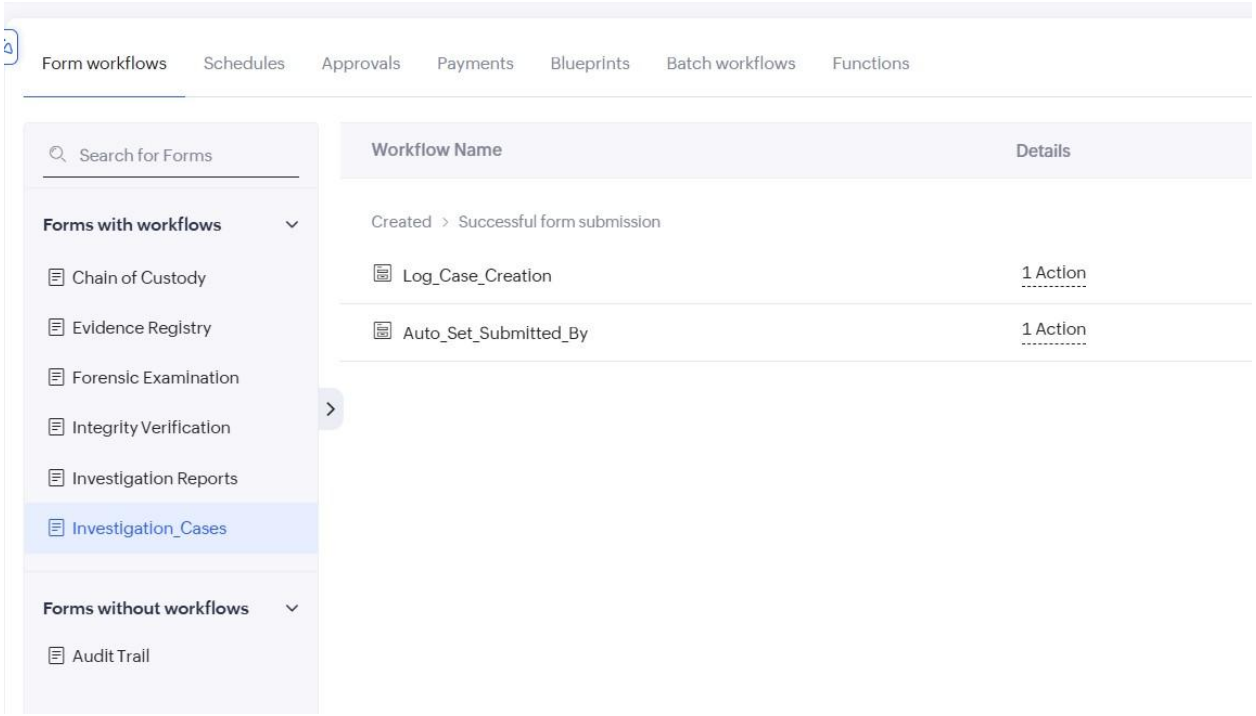

Procedure

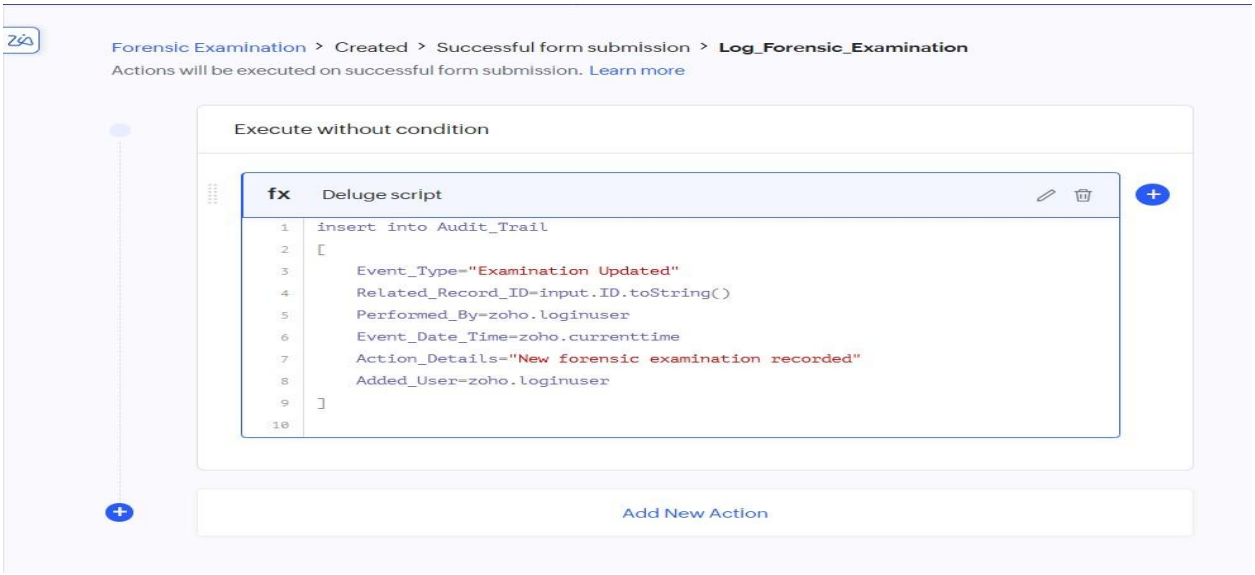

1. Open the EviTrace application in Zoho Creator.
2. Navigate to Workflow → Form Workflows.
3. Configure workflows for forms such as Investigation Cases, Evidence Registry, Chain of Custody, Forensic Examination, Integrity Verification, and Investigation Reports.
4. Set appropriate form events, such as record creation and successful form submission, to trigger the workflows.
5. Create the Deluge function `Log_Investigation_Event` to record audit details such as event type, related record ID, date and time, and action details.
6. Configure the relevant workflow to call the audit function when a record is created.
7. Create the `Log_Custody_Transfer` workflow to automate custody-transfer activities.
8. Save and test the workflows.

Result

Form workflows were configured in Zoho Creator to automate custody-transfer activities and audit logging in the EviTrace application.
